

PHILIP DANNY AJIK

Aspiring Cybersecurity Professional | Cisco Junior Analyst | Python Developer

Plateau State, Nigeria | linkedin.com/in/philip-ajik | github.com/philip-ajik

PROFESSIONAL PROFILE

Final-year Computer Science student at Plateau State University Bokoos with hands-on experience in defensive cybersecurity, Python development, and network infrastructure. Completed the Cisco Junior Cybersecurity Analyst Career Path and currently on the TryHackMe SOC Level 1 learning path, gaining practical skills in threat detection, SIEM tooling, and incident response frameworks. Founder and lead instructor of Akathon Cy_Net — a campus cybersecurity and networking learning community. Passionate about building AI-integrated security tools and progressing toward a CISO-level career in the African tech ecosystem.

EXPERIENCE

Remote Intern

2026 – Present

[FlyRank AI](#) | [Remote](#)

- Contributing to AI-related projects and workflows at FlyRank AI as a remote intern.
- Applying Python programming and AI tooling knowledge to support team deliverables.
- Gaining professional exposure to AI product development and distributed team collaboration.

Founder & Lead Instructor — Cybersecurity & Networking Track

2025 – Present

[Akathon Cy_Net \(under Akathon Organisation\)](#) | [Plateau State University Bokoos, Nigeria](#)

- Designed and delivered a 16-session curriculum (NET and CY tracks) for a mixed-background student cohort, covering networking fundamentals through cybersecurity operations.
- Produced all teaching materials — weekly student notes, exit quizzes, lab handouts, and a programme roadmap — ensuring progressive skill development from Week 0 to Week 15.
- Led hands-on Cisco Packet Tracer labs and cybersecurity exercises, reinforcing theory with practical application.
- Identified and resolved student learning gaps in real time (e.g. developed a subnet mask supplement after observing struggles during live lab sessions).

Online Python Tutor

2025 – Present

[Preply](#) | [Remote](#)

- Delivered personalised Python programming lessons to students of varied backgrounds via the Preply platform.
- Designed practical, project-based lesson plans to accelerate learner progress and build real-world coding confidence.

KEY PROJECTS

Multi-Chain Wallet Balance Checker — Telegram Bot

2026

[Python](#) | [Web3.py](#) | [Alchemy API](#) | [Telegram Bot API](#)

- Built a Telegram bot that checks live wallet balances across Ethereum, BNB, and Polygon chains using Web3.py and Alchemy's node API.
- Handles multi-chain RPC switching, address validation, and formatted balance reporting in a single bot command.

Blockchain Transaction History Bot

2026

[Python](#) | [Web3.py](#) | [Alchemy API](#)

- Developed a bot that retrieves and displays full transaction history for any wallet — sender, receiver, amount, and transaction hash — via a Telegram interface.

NFT Portfolio Checker

2026

[Python](#) | [Alchemy NFT API](#)

- Built a tool to query and display a wallet's NFT holdings across supported chains using the Alchemy NFT API.

EDUCATION

B.Sc. Computer Science (400 Level)

Plateau State University Bokkos | Plateau State, Nigeria

- Studying Computer Science with a focus on cybersecurity, Python, systems architecture, AI, and finance.
- Active community builder on campus through the Akathon organisation.

In Progress

SKILLS

Cybersecurity	Frameworks	Programming	Soft Skills
SIEM (Splunk, ELK/Kibana), Threat Intelligence, CyberChef, AbuselPDB, Blue Team Operations	Cyber Kill Chain, MITRE ATT&CK & D3FEND, Unified Kill Chain, Pyramid of Pain, Palantir ADS	Python (Intermediate), Web3.py, Telegram Bot API, Alchemy API, Cisco Packet Tracer	Teaching & Curriculum Design, Community Leadership, Technical Writing, Problem-Solving
